

Early Childhood Iowa Statewide Report: Family Services FY24

Heather Rouse, Todd Abraham, Cora Herbkersman, Giorgi Chighladze

This report was prepared by the lowa State University team at lowa's Integrated Data System for Decision-Making (I2D2), on behalf of Early Childhood lowa through a funded contract to use data provided by the DAISEY system maintained by partners at Kansas University. Description of the data methodology and limitations are included below. Please direct questions regarding this report to the ECI main office (amanda.winslow@hhs.iowa.gov or (515) 415-1555). For data related questions, please contact the DAISEY Help Desk using the "Help" button on the DAISEY dashboard or by contacting (daisey.iowa@ku.edu).

INTRODUCTION

METHODOLOGY

Fiscal year 2024 (FY24) Family Support data were exported from the DAISEY dashboard on August 20, 2024. Consistent with the DAISEY reporting platform, families are defined by Primary Caregivers who were active during the reporting period, regardless of Primary Caregiver gender. All assessment indicators and metrics were computed consistent with definitions used in the DAISEY reporting tools.

LIMITATIONS

Accuracy of the data retrieved and reported here is entirely determined by the accuracy of the data originally entered in the DAISEY system. No data cleaning, corrections, or additional deduplication was performed. Families may be served by more than one program, or families may have moved during the year and may have been served in multiple communities. Due to the 'live' nature of the DAISEY system, comparisons between numbers in this report and those from current DAISEY reporting tools will differ to the degree that any data have been added, removed, or updated after the export date for this reporting period.

ACRONYMNS AND TERMS TO KNOW

ECI stands for Early Childhood Iowa. **I2D2** stands for Iowa's Integrated Data System for Decision-Making. **IHHS** stands for Iowa Health and Human Services

FPL indicates Federal Poverty Level. In 2024, 200% of the FPL was \$62,400 for a family of 4 (<u>Health and Human Services FPL guidelines</u>).

GBPE indicates a Group-Based Parent Education program **LDM** indicates a Locally Developed Model (otherwise known as Promising Practices) Evidence Based Programs:

PAT = Parents as Teachers **HFA** = Healthy Families America

EHS = Early Head Start

NFP = Nurse-Family Partnership

STATEWIDE ENROLLMENT CHARACTERISTICS

Note: In FY24, there were only two EHS programs and two NFP programs in Iowa. The participant population in NFP programs in FY24 was especially small. EHS and NFP programs were not included in Figure 1, below, due to these small sample sizes. However, the programs were included in Table 1, which includes all enrollment numbers for all program types.

Note: Statewide numbers in Figure 1 do not include GBPE program data.

Note: Statewide numbers in Table 1 do not include GBPE program data.

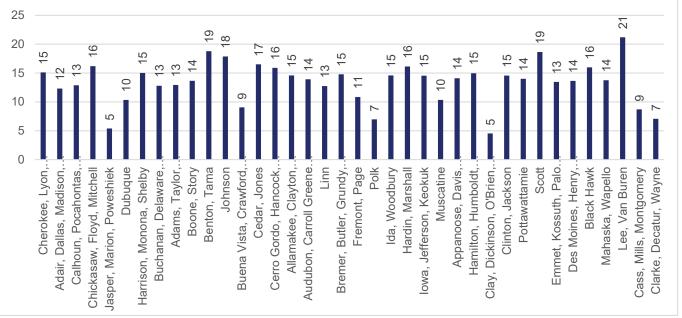

ECI AREA ENROLLMENT CHARACTERISTICS

The potential population served by ECI area programs was estimated using the rate of poverty among children less than six years of age (See Figure 2). In Figures 3-6, the ECI areas will be displayed in the order seen in Figure 2, to allow for consistent comparisons among areas with similar poverty levels.

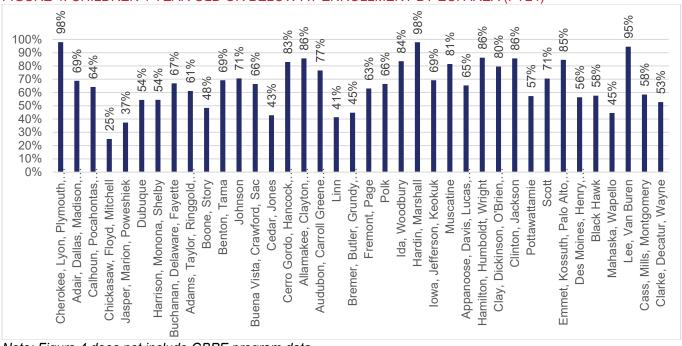

Note: The data for Figure 2 was taken from the Dashboard. The I2D2 Dashboard retrieves this data from the <u>American Community Survey (ACS) 5-Year Estimates - Table B17020</u>. The I2D2 Dashboard defines children in poverty as children who live in families with incomes below 100% of the FPL. In 2023, this was \$30,000 for a family of 4 (Health and Human Services 2023 FPL guidelines).

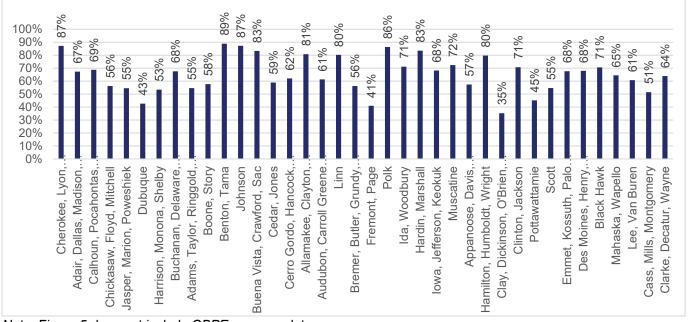

Note: Figure 3 does not include GBPE program data

FIVE-YEAR TRENDS IN ENROLLMENT CHARACTERISTICS

^aIn 2024, 200% of FPL was \$62,400 for a family of 4, and 125% of FPL for a family of 4 was \$39,000 (<u>Health and Human Services FPL guidelines</u>).

^bDevelopmental Screening Completed indicates a completed Ages and Stages Questionnaire (ASQ-3). Note: All totals in Figure 7 include GBPE programs.

PROTECTIVE FACTORS SURVEY - RETROSPECTIVE (RPFS) SCREENING

Note: In FY24, only 25 programs, out of 133, reported using the Protective Factors Survey – Retrospective (RPFS). This resulted in low sample sizes. This is likely due to a transition between the PFS and the RPFS. Additionally, there were only two EHS programs and two NFP programs in lowa. EHS and NFP programs were not included in Table 9, below, due to these small sample sizes.
